**Shanghai School
(SSS) 2015 program**

is sponsored by Shanghai Municipal Education Commission hosted by Tongji University and organized by Sino-French Institute of Engineering and Management (IFCIM), Tongji University. Lectures are delivered by distinguished professors of universities and guests of relevant industries from home and abroad in this Summer School. It will recruit 40 excellent students from European universities who major in Architecture, Urban Planning, Arts Design, Environment, and Laws. They are expected to propose creative solutions and promote a better urban life through joining in researches and practices centring on the theme of “Eco-friendly City and Sustainable Development Tours”. 2015 Program serves the purpose of creating a green and creative journey for the participants with its global, inter-disciplinary and cross-cultural characteristics.

I Theme:

Eco-friendly City and Sustainable Development

The theme of this Summer School focuses on city, sustainable development and life style. Students of relevant majors will be chosen to attend the Summer School with four modules:

1. [Discovering Shanghai](#)
2. [Eco-friendly City](#)
3. [Environmental Protection](#)
4. [Outcome Exhibition](#)

Students are supposed to attend group discussions and researches through well-organized lectures and visits with specific themes, complete team reports and exhibit outcome based on their experience and learning through inter-disciplinary teamwork.

II Schedule

This Summer School will last for four weeks starting from 28 June to 26 July with four modules, i.e. Discovering Shanghai, Eco-friendly City, Environmental Protection and Outcome Exhibition.

a. Module

Module I (28 June – 4 July): Discovering Shanghai

This module initially informs foreign students of the contemporary urban life style of Shanghai before allowing them to acquire basic knowledge about the history and culture of Shanghai and to experience her glamour. It proposes a variety of lectures and visits while guiding students to explore its mix of modern and traditional cultures.

Module II (5 July – 11 July): Eco-friendly City

Through organizing field trips to Chongming Island and other small towns in its vicinity, this module enables you to further understand re-planning and protective outcomes for the neighbouring ancient towns like Zhu jiajiao and Wuzhen, e.g. Professor RUAN Yisan's important contributions.

Module III (12th July~18th July): Environmental Protection

Equipped with the preliminary concepts and research

results, students are arranged to attend visits and lectures and discuss the issues on numerous environmental protection and improvements. Meanwhile, each group will submit a final plan after the group reports and consultancy with tutors.

Module IV (19th July~26th July): Outcome exhibition

Each group, with the support of tutors, is obliged to study the sustainable development index of Shanghai and put forward relevant suggestions on planning in terms of Environmental Health, Eco-vitality and Cities and Climate Change through the methods of surveys and interviews. A jury of experts will make marks and comments on the outcomes. The Summer School ends up with a graduation ceremony and a farewell party.

All students will be divided into three groups with one topic each. Kindly choose the topic that interests you when filling in the application form.

b. Groups

1. Environmental health: Explaining the relationship between environment and health from the aspects of chemical factor, physical factor and biological factor. And investigating all indexes of environment and health based on a combination of atmospheric situation, aquatic condition and soil level. Thus, evaluating the status of local environment, residential health, residential environment and food safety. Finally, giving specific policies and planning suggestion for Shanghai associated with corresponding policies and practice of international similar cities.

2. Ecological vitality: China has proposed the goals of constructing ecological civilization under the situation of

unrenewable resources, biodiversity decrease, fractured metabolism and the inbalance of biological system, within the tendency of rapidly increasing contradiction between environmental protection and the development of human, nature and economy. This group will research the relative policy and practices focused on the improvement of local ecological vitality and local construction of ecological civilization to give the effective policies and planning suggestions for Shanghai, considering the corresponding policies and suggestions in similar European cities.

3. Cities and climate change: The climate change conference of year 2015 will be hosted in France, seeing an increasing attention from the world. City have increasingly become the primary site for human activity, and this situation brings much pressure for cities to treat with climate change. This group will explore the effects of climate change on the local area and the economical benefit, multiple management, financial methods and activate policies from the local treatment conducted for climate change. Shanghai's development experience can serve as an example for cities faced with similar challenges in the world.

III Participants:

1. Number of students: 40 students
2. Universities: European Partner Universities
3. Requirements: major in Architecture, Urban Planning, Arts Design, Environment, and Laws (juniors or above)
4. Grouping: two groups with 4-6 students each, assigned one tutor, work on one topic

IV

Lectures

The Urban Planning and Sustainable Development of Shanghai (Dr. Wang Xin, the Vice Dean of UNEP-Tongji Institute of Environment for Sustainable Development)

Global Sustainable Development Agenda (Dr. Young-woo Park, Vice Dean of UNEP-Tongji Institute of Environment for Sustainable Development, Former Regional Representative and Director for the Asia and Pacific, UN Environment Programme)

Best Practice of Chinese Green Cities (Prof.

Zhu Dajian, the Director of the Research Center for Sustainable Development and management, Tongji University)

Sustainable Cities and Water Management (Prof. Li Fengting, the Deputy Dean of UNEP-Tongji Institute of Environment for Sustainable Development, College of Environmental Science and Technology, Tongji University)

The World Expo, Buildings and Sustainable Development (Prof. Zheng Shiling, Academia of the Chinese Academy of Science)

Sustainability-oriented Transportation System (Prof. Zhang Lun, Professor of the School of Transportation Engineering, Tongji University)

Low Carbon Development Strategies of Shanghai towards a Green Economy (Dr. Zhang Jing, the College of Environmental Science and Technology, Tongji University)

Shanghai Emissions Trading System (Prof. Liao Zhenliang, Professor of the College of Environmental Science and Technology, Tongji University)

The Practice of Solid Waste Management in China (Prof. Niu Dongjie, Professor of the College of Environmental Science and Technology, Tongji University)

Cities in the Haze – Urbanization and Air Pollution (Prof. Jiang Dahe, Professor of UNEP-Tongji Institute of Environment for Sustainable Development, the College of Environmental Science and Technology, Tongji University)

“Youth Responsibility for Green Cities and Sustainable Development” Sino-Europe Students Dialogue (TBC)

V Expected Outcomes:

Students are required to, basing on the previous study and surveys, evaluate Shanghai sustainable development index and present the relevant planning proposals by virtues of close and inter-disciplinary teamwork. All achievements are illustrated through a diversified approach including graphics, reports and physical models. The outcome of the Summer School will be exhibited on 25 July at Sino-French Centre of Tongji University.

VI How to Apply

Admission:

The organizer will confirm the admission and send the invitation letter to selected students by June 2th, 2015

Application:

- * Submit the complete dossier
- * Application form
- * Recommendation letter from home university
- * Guarantee Letter
- * Copy of passport
- * Digital photo(JPG,<200K)

To sssfctongji2015@163.com before May 18th,2015

Scholarship:

All local expenses(accommodation, collective transportation, meal,etc)will be covers by organizer.

VII Agenda

AGENDA OF THE 2015 SHANGHAI SUMMER SCHOOL							
DATA		TIME	ARRANGEMENTS	Course Hours			
				Academic	Chinese Culture	Visits &	Workshop
28-Jun	SUN		Registration				
			Welcome Dinner				
			Night Tour on the Bund				
29-Jun	MON	Morning	Welcome Remarks				
			Brief Introduction to Shanghai Summer School				
			Lunch on Campus				
		Afternoon	Lecture 1: The Urban Planning and Sustainable Development of Shanghai (Dr. Wang Xin, the Vice Dean of UNEP-Tongji Institute of Environment for Sustainable Development)	2			
			Chinese Language Class 1 (Basic/Medium)		2		
30-Jun	TUE	Morning	Lecture 2: Global Sustainable Development Agenda (Dr. Young-woo Park, Vice Dean of UNEP-Tongji Institute of Environment for Sustainable Development, Former Regional Representative and Director for the Asia and Pacific , UN Environment Programme)	2			
			Chinese Language Class 2 (Basic/Medium)		2		
			Lunch on Campus				
		Afternoon	Visit 1: Shanghai Museum			2	
			Visit 2: Shanghai Urban Planning Exhibition Museum			2	
			Free Activity in People's Square (Dinner not Organized)
